In-Ground Tetherball Set

PARTSLIST					
Item	Qty		Item	Qty	
A	2	Pole	E	5	5/16" Lock Nut
B	1	Ground Sleeve	F	4	5/16" X 2 1/4" Hex Bolt
C	1	Ground Sleeve Plug	G	1	Connector
D	1	Eye Bolt	H	1	Tetherball and Rope

- ◆ Inspect all contents prior to installation.
- ◆ Report any missing parts to dealer immediately.

Ensure the area around the pole or ground sleeve installation is clear of obstructions. A minimum of 12' diameter around the pole or ground sleeve is recommended.

1. Remove *Ground Sleeve Plug* (C) from *Ground Sleeve* (B). You will find *Eye Bolt* (D), *5/16" X 2 1/4" Hex Bolts* (F) and *5/16" Lock Nuts* (E) inside *Ground Sleeve* (B). See Figure 1.
2. Use *Connector* (G), *5/16" X 2 1/4" Hex Bolts* (F) and *5/16" Lock Nuts* (E) to assemble *Poles* (A). Make sure the anti-rotation notch is down on both *Poles* (A). Insert the *Eye Bolt* (D) into the hole on the top of *Pole* (A), use *5/16" Lock Nut* (E) to secure *Eye Bolt* (D) to *Pole* (A). See Figure 2.
3. Attach *Tetherball and Rope* (H) to *Eye Bolt* (D). See Figure 2.
4. Dig a hole 8" in diameter and a minimum of 30" deep and fill with firm but wet concrete.
5. For permanent installation insert *Pole* (A) into the firm but wet concrete. *Pole* (A) to be installed approximately 10" below the playing surface, the tetherball should hang approximately 2' from the ground. Make sure to have bracing materials to hold *Pole* (A) at desired height and plumb to playing surface while concrete cures. See Figure 3.
6. For removable installation insert *Ground Sleeve* (B) into firm but wet concrete until top of *Ground Sleeve* (B) is flush with the concrete. Level the top of *Ground Sleeve* (B) to insure plumb installation. Make sure no concrete gets inside of *Ground Sleeve* (B). See Figure 3.
7. Use *Ground Sleeve Plug* (C) to keep *Ground Sleeve* (B) free of debris when *Pole* (A) is removed. See Figure 1.

Warning!
Do not let children move Pole (A) as injury may occur
