Ultimate HangTime™ Adjustable Systems shall consist of a 6" square, 3/16" wall steel support pole with movable extension arms to allow rim height adjustment from 7 ½' to 10'. Rim height adjustment shall be accomplished by means of a hand operated bevel gear crank located on the rear of the pole. Pole system shall include a hinged swing up base and anchor system to allow for easy assembly. Steel ground anchor shall be installed in a concrete footing that is no less than 20" in diameter and 48" deep. Backboard specifications shall be chosen from the options shown in the chart above consisting of various sizes and materials. The distance from the face of the backboard to the front of the pole shall be a minimum of 56" when the rim is adjusted to official 10' height. Rim shall be outdoor breakaway type and be mounted through the backboard directly into the rear structure to eliminate stress on the backboard during play. Pole shall have an easy-to-read rim height indicator. All steel components shall be powder coated black. Pole system shall carry a 10-year limited warranty and rim a 1-year limited warranty. Installation shall be completed in accordance with manufacturer's instructions. Available options shall include pole padding, backboard padding and crank lock. Approximate weight 450# - 550#.

## PRODUCT SPECIFICATION

All 6" HangTime™ Adjustable Systems
